

GUARDA FUME TUBE

CONVENIENT FUME
EXTRACTION FOR PETROL
POWERED CONCRETE SAWS

GUARDASYSTEMS.COM

GUARDA

WORK HARD. BREATHE EASY.

MIP
most **innovative** products
AT WORLD OF CONCRETE

FEATURES & BENEFITS

- Removes deadly fumes such as Carbon Monoxide away from the operator via vacuum suction.
- Fume Tube can be used with many petrol-powered, cut-off saws
- Can be used with up to 50m (150 ft) of extension hose. (Assumes minimum airflow and pressure specifications as per Fume Tube Connections & Operating Procedures)
- Small and convenient to transport around
- Low ongoing maintenance costs
- Quick and easy to setup
- When properly set up can be used to replace electric or hydraulic alternatives when cutting indoors or in enclosed spaces.

Must be used with a suitable wet vacuum system and water supply turned on as outlined in the operating procedures. Vacuum must always be placed outside to exhaust fumes

FUMETUBE

HOW DOES IT WORK AND WHAT DOES FUME TUBE DO?

- Attaches to the saw's muffler via a threaded attachment
- Connects to a suitable wet vacuum system, placed outside in a well ventilated area
- Helps move harmful fumes such as Carbon Monoxide away from the operator and the immediate cutting area

REFERENCE INFORMATION ABOUT CARBON MONOXIDE

An OSHA fact sheet on CO poisoning states that "large amounts of CO can overcome you in minutes without warning – causing you to lose consciousness and suffocate."

READ THE OPERATING PROCEDURES AND WARNINGS BEFORE USING THIS PRODUCT.
