GENERATOR FOR REMOVING
FUMES, DUST & SLURRY**

GUARDASYSTEMS.COM

GUARDA

WORK HARD. BREATHE EASY.

FEATURES & BENEFITS

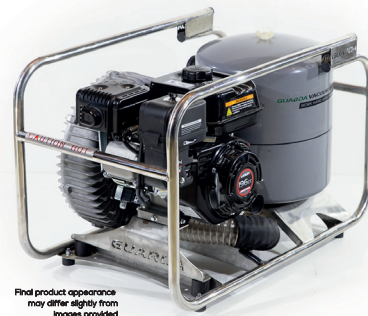

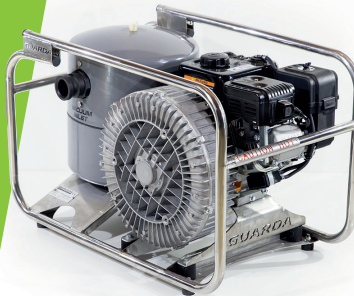

- Can replace an electric vacuum and generator set-up. All in one solution.
- Easy to set up & operate.
- Can remove silica dust, exhaust fumes & slurry all in one operation.
- Especially suitable for civil works and wet cutting operations where there is no convenient electrical supply source.
- Can be used in conjunction with the Guarda Fume Tube and Guarda Edge Powercutter when cutting indoors or in enclosed spaces (Note: The Guarda Vacuum Generator should always be placed outdoors to exhaust fumes).
- Can be used with dry cutting operations where a hepa filter is placed in the vacuum line.
- Can be used to vacuum slurry where a slurry separator is placed in the vacuum line.
- Engine complies with EPIII & CARB I emission standards.
- Lightweight and compact.
- Continuous operation 24/7
